Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 00:00 on Wednesday 21 Jul 2021 until 23:59 on Thursday 22 Jul 2021

Forecast Issued on Tuesday 20 Jul 2021 at 15:43

Confidence: Good confidence for two more days of very warm, largely sunny weather. Low confidence on extent and timing of any thundery showers. Moderate confidence for a change to cooler, fresher conditions, gradually through Friday, but more notably Saturday with showers spreading northeast.

Headline for Wednesday 21 Jul 2021: Early cloud clearing. Then very warm and sunny, but with a chance of the odd thunderstorm later.

Mountain weather hazards on Wednesday 21 Jul 2021

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** No Likelihood
Thunderstorms Low Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** High Likelihood

Forecast for Wednesday 21 Jul 2021

Weather: Some early cloud is possible around dawn, perhaps limiting views from eastern hills. The odd spot of drizzle also possible. This soon burning away to give a fine day with plenty of unbroken sunshine. Feeling very warm. Very isolated heavy, thundery showers are again possible by the afternoon or early evening, which could bring torrential downpours or hail, although these will miss most routes.

Chance of cloud free mountain/hill tops above 600m: 60% at first, with main risk of obscured hills across eastern parts. Improving to near 100% through the day. Just the outside chance of the odd patch on highest hills during heavy thundery showers.

Visibility: Generally good to very good visibility. Some poor to very poor views possible above 200m in the east around dawn, where hills are obscured by cloud. Also falling to moderate or poor, perhaps briefly to very poor, during any isolated heavy thundery showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Another very warm and humid day, with dehydration and heat stress the main hazards. Sun protection and sufficient fluids essential. Also good to take a waterproof and to be ready to change plans, if any thundery downpours develop. Thundery showers could also include isolated gusts of 20-30mph.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 20 Jul 2021	0mm	0mm	0mm

Forecast for Thursday 22 Jul 2021

Weather: Likely clear overnight, although the chance of some low cloud returning from the east, before burning away shortly after dawn. Another very warm and sunny day follows before further thundery showers develop during the afternoon. These again missing most routes, but have the potential to be heavy where they do occur, with hail and torrential downpours.

Maximum wind: Easterly 5-10mph, but isolated gusts up to 30mph near showers.

Chance of cloud free mountain/hill tops above 600m: Near 100%. Just the outside chance of the odd patch on highest hills during heavy thundery showers.

Visibility: Very good, only falling to moderate or poor, perhaps briefly very poor, during any heavy showers.

Temperature: **Valleys:** Plus 14 becoming Plus 26 Celsius
At 600m: Plus 15 becoming Plus 21 Celsius
Freezing level: Above summits.
